March 15, 2011

Subject: Information regarding the Northeast Pacific Earthquake in Japan

**To our Valued Customers, Sales Channels and Employees,**

In reaction to the Northeast Pacific Earthquake which occurred on March 11, 2011, we at Anritsu Industrial Solutions Co. Ltd. are focused on fully recovering our production systems while putting the highest priority on the safety of our employees and their families.

**Status of Anritsu Industrial Solutions Co. Ltd.  
Atsugi, Japan**

- Employees: With thanks, we confirmed all of our employees are safe and fine.
- Corporate Offices and Production facilities: **We have not suffered any major damage or loss.**
- Regional Branch Offices in Japan Marketplace: The Northeast Japan branch received some minor damage from the earthquake, but it will be restored very soon.

**Business Operations**

Although we closed our offices in Japan on March 14, we have been making our best effort to minimize business disruptions and have effectively restarted our regular operations although the performance has not reached 100% capacity at the time of this notice. We will continue our effort for full recovery over the coming days.

**Shipments and Logistics**

As reported, some of the nuclear plants in Japan were shut down because of the earthquake and tsunami, and shortage of electricity is evident throughout Japan. We have a concern that it will affect the company's overall logistics (yet shipments are moving via normal channels as of today) because planned rolling power outages are for the entire Tokyo area (Kanto area), including Atsugi where our corporate office is located. These rolling blackouts are scheduled on a regular time basis, and therefore we will plan as required to effectively minimize the power shortage impact on the overall business.

You have our promise that we will do our best to get back to 100% capacity. We anticipate the production and handling enquiries will be delayed in the short term to some extent yet unknown or definable but manageable. We thank you in advance for your understanding and would really appreciate your patience on the expected delay.

Yours truly,

Toru Kazama  
Senior Vice President  
Anritsu Industrial Solutions Co., Ltd. (JAPAN)
